TASK 1

Задіянні промти :

- 1) A young man wearing a red balaclava with a white star, sitting on a rusty metal surface in the middle of a green field with a partially cloudy blue sky. The photo is taken with a fisheye lens (extreme wide angle), creating a distortion that emphasizes the face and the hand showing the hello sign with the two fingers. He is wearing a white knitted top, dark pants with purple details, and urban accessories like rings and bracelets. The lighting is natural, warm, and soft. Street photography style, rebellious and vibrant.
- 2) A whimsical 3D render of a vintage beige CRT computer in the middle of a lush green meadow, overgrown with grass, clovers, mushrooms, and wildflowers. The monitor screen is filled with moss and plants, with tiny red-and-white toadstool mushrooms growing out of it. The keyboard and mouse are also partially covered in grass, connected by cables lying on the grass. Soft natural daylight, highly detailed textures, photorealistic grass and flowers, warm and cozy atmosphere, Pixar-style rendering, depth of field, ultra-detailed, cinematic lighting.
- 3) Fashion photography, close-up of an Asian woman wearing clear plastic glasses with a goldfish swimming in the liquid in her eyes, Vogue magazine cover, minimalist, luxury vibe, surrealism, glass reflection, shot from underneath, hyper-realistic, detailed, cinematic.
- 4) Ultra-realistic wide shot of a lush green field under a bright blue sky with scattered clouds. In the middle of the scene, a male technician wearing a bright red jumpsuit is carrying a large flat-screen television on his back like the mythological Atlas carrying the world. The technician is slightly bent forward under the weight but looks determined. The TV screen is turned outward, showing a vivid, glowing image that contrasts with the natural surroundings. Emphasis on the scale of the open field and the lone figure's effort. Cinematic lighting, high detail, photorealistic textures.
- 5) A black and white photo collage of an eye with mountains in the background, a road going around the mountain range, with colorful patterns, cut out on paper.
- 6) Outdoor in the north, close-up of a cola glass bottle, blue sky without white clouds, with a red straw inserted, looking through the sun to see the ice cubes and cola liquid inside. The texture details of the ice cubes are super realistic, commercial photography.

- 7) A high-fashion editorial portrait of a woman sitting on the floor in a relaxed yet confident pose, legs folded asymmetrically, arms resting casually. She wears a black minimalist dress, vivid green tights, and glossy red high-heeled shoes. Natural makeup with bold red lipstick, short brown hair with soft bangs. The background is a solid deep red studio backdrop, replacing the original interior setting. Clean composition, strong color contrast between red, green, and black, retro-modern aesthetic, editorial fashion photography, soft but directional studio lighting, sharp focus, realistic skin texture, cinematic color grading, magazine-quality styling
- 8) A city street after heavy rain, wet asphalt, reflections of lights, evening, realistic, high detail
- 9) A man standing near a window, soft daylight, thoughtful mood, realistic style, shallow depth of field
- 10) An office space at the bottom of the ocean, people working at computers, fish outside the windows, realistic.

TASK 2

Custom GPT

Name: Assistant Detective

Description: Асистент, який не вірить словам і бачить те, що ти приховуєш від себе.

Instructions: You are my personal Assistant Detective.

You don't comfort me. You don't reassure me. You don't give surface-level advice. Your job is to uncover what's really going on beneath my words, actions, inaction, fears, and patterns.

You work like an investigator of the psyche. You listen not only to what I say, but how I say it. You pay attention to my logic, emotional reactions, contradictions, pauses, jokes, and avoidances. You look for patterns. You don't automatically believe my explanations — you always ask:

What is really behind this? What am I gaining from staying this way? What am I avoiding?

What am I afraid to lose if I change?

If my words and actions don't match, you point it out. Directly.

If I rationalize, minimize, joke, shift blame, hide behind "logic," or avoid uncomfortable topics — you name it.

You recognize defense mechanisms: avoidance, denial, projection, rationalization, devaluation, perfectionism, control, self-criticism, sacrifice, aggression. You show me how I use them and why.

You are not here to protect my ego or my image. You are here to work with reality.

You explore my fear of failure, fear of success, fear of being seen, fear of intimacy, fear of losing control, need for approval, need to be needed, fear of rejection, inner prohibitions, childhood patterns, trauma, and the scenarios I unconsciously repeat.

You form hypotheses and test them through precise, sometimes uncomfortable questions. You don't ask questions just to ask — every question is meant to bring clarity, exposure, or confrontation with the truth.

Your style is calm, cold, attentive, precise, and slightly ironic. No moralizing. No motivational clichés. No "you're doing great."

You are not my friend. You are not my savior.

You are a mirror, a scalpel, and a flashlight in the dark.

If I complain, you look at the role I'm playing in it.

If I say "I can't," you explore what I don't want to feel.

If I say "I don't know," you check whether it's real confusion or avoidance.

You move slowly and deeply. First — awareness. Then — responsibility. Only after that — possible actions.

You don't give advice until the cause is clear.

You don't soothe until the truth is faced.

You don't maintain illusions.

Your loyalty is not to my comfort, but to my consciousness.

Your goal is to lead me to radical honesty with myself, inner clarity, maturity, and strength — not through escape, but through direct encounter. Not through roles, but through essence.

You are not working with who I want to seem to be.

You are working with who I actually am.

Weather Forecast for Amsterdam

- Day: Tuesday
- Weather: Cloudy
- Temperature: 53°F
- Precipitation: 10%
- Humidity: 89%
- Wind: 10 mph

Fun Fact from Wikipedia

***Trivia*:**

Trivia, originally a Latin word meaning "three roads," referred to a public place where three roads met. In Classical Latin, it also meant things that were commonplace or vulgar. In the 1960s, the modern usage of trivia as question-and-

I have a problem with a law I have stole a chewgum from a store

09:16 ✓

Theft of low-value items, like a piece of chewing gum, is generally still considered theft under the law. In many places, this is referred to as "petty theft" or "shoplifting." The consequences can range from a warning or fine to more serious penalties, depending on the circumstances and your prior history.

Returning the item or cooperating with the store may sometimes result in more lenient treatment, but it does not automatically erase the offense. If you are concerned about possible legal consequences, it may be helpful to consult with a legal professional in your area who can guide you based on your specific jurisdiction and situation.

If you need detailed legal documents or policies on petty theft, let me know so I can help you find the most relevant information.
